ABOUT ME

Full-stack web developer and Computer Science graduate with hands-on experience building and deploying production-grade web applications. Proficient in React.js, Node.js, PHP, MySQL, and Firebase. Delivered an internship project serving live users and independently built systems handling authentication, role-based access, real-time data, and automated business logic. Seeking a Web Developer or Software Developer role where I can build meaningful, scalable products.

SKILLS

Frontend Development: JavaScript, React.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js (Express), PHP (Laravel, CodeIgniter), REST APIs

Databases: MySQL, Firestore (Firebase)

CMS / E-commerce: WordPress, WooCommerce

Programming Languages: Java, Python (Flask), C, C++

Mobile Development: Flutter, Dart, FlutterFlow, Android Studio, Expo/Expo Go

Tools & Platforms: Git, GitHub, Visual Studio Code, Adobe Creative Suite, Canva, Figma, XAMPP, Vercel, Vite, Render

EXPERIENCE

Web Developer Intern

June 2025 - August 2025

iFormatLogic IT Solutions

Live Project: <https://optix-lab-wandering-astronauts-projects.vercel.app>

Tech Stack: HTML, CSS, JavaScript, PHP, WordPress, WooCommerce

- Developed a fully responsive e-commerce website using *HTML*, *CSS*, and *JavaScript*
- Built and customized *WordPress* and *WooCommerce* functionality for product listings, cart, and checkout system
- Translated UI/UX designs into a functional and user-friendly web application
- Optimized website performance and ensured cross-browser compatibility
- Conducted debugging and testing to improve reliability and user experience
- Deployed and hosted the final website, making it publicly accessible

PROJECTS

EMPLOYEE TIME & ATTENDANCE TRACKING SYSTEM

React.js, Node.js + Express, Tailwind CSS, Firebase

Github Repo: <https://github.com/Wandering-Astronaut/mini-hcm>

- Built a full-stack HCM system using React.js, Node.js/Express, and Firebase, featuring employee authentication, real-time punch in/out recording, and automated computation of regular hours, overtime, night differential, lateness, and undertime based on per-user shift schedules. Includes a role-based admin dashboard with daily and weekly attendance reports and KPI summaries.

FACILITY AND PARKING INFORMATION MANAGEMENT SYSTEM

HTML, CSS, Javascript, PHP(CodeIgniter), MySQL

Github Repo: <https://github.com/Wandering-Astronaut/FPIMS>

- Developed a web-based system for managing facility bookings and parking slot availability using CodeIgniter PHP. Created responsive user interfaces with HTML, CSS, and JavaScript to display real-time availability and booking status. Implemented role-based access controls and an admin dashboard for facility monitoring and user management.

MEDIA CONVERSION WEB APPLICATION

HTML, CSS, JavaScript, Python, Flask, FFmpeg

Github Repo: <https://github.com/Wandering-Astronaut/mediaconvert-app>

- Developed a Flask-based web application for extracting and converting online media into downloadable MP3 files. Integrated FFmpeg for media transcoding and implemented automated file handling and cleanup. Built a streamlined browser-based interface enabling users to upload, process, and download converted files efficiently.

EDUCATION

Bachelor of Science in Computer Science

2022 - 2026

Columban College, Inc. | Dean's List, 2022-2026 | Academic Honor, 2024-2025

CERTIFICATIONS

CCNA: Switching, Routing, and Wireless Essentials | NDG Linux Essentials | PCAP - Programming Essentials in Python
CPA - Programming Essentials in C++ | CLP - Advanced Programming in C | CLA - Programming Essentials in C
